**Blunt Peripheral Vascular Trauma**

**Hard Signs**
- Pulseless extremity
- Active arterial/venous bleeding
- Expanding hematoma
- Palpable thrill
- Audible bruit

**Soft Signs**
- History of bleeding at the scene
- Diminished pulse
- Non-pulsatile hematoma
- Neurologic deficit
- Proximity to major vessel

**Operating Room**
Consider vascular surgery consultation

**Absent pulse**
- Diminished pulse
- Abnormal ABIs (< 0.9)
- Palpable thrill/audible bruit
- History of bleeding at scene
- Proximity to major vessel
- Non-pulsatile hematoma
- Neurologic deficit

**Reduce fracture if present**
CTA BLE

**(+ Injury**
- (-) Distal flow

**Operating Room**
(consider Hybrid OR)
Consider vascular surgery consultation*

**Vascular Surgery**
consultation for open, endovascular or catheter-based interventions

*Consider/discuss post-operative anticoagulation and/or antiplatelet therapy
